

Press release 17 November 2009

## Ride (with) your socks off this winter

### *KEIS 12V Heated Insoles*

If you get cold feet at the thought of riding through the winter, KEIS Heated Insoles might just be the answer. Part of the KEIS range of heated apparel, the Heated Insoles come complete with everything needed to connect directly to the machine's 12 volt supply.

Simply trim the soles to the desired size using the printed guide, pop into your riding boots, plug in, and enjoy toasty warm feet on even the coldest of winter rides. Manufactured using robust one-piece encapsulated elements, the soles are built to last, and unlike many other heated garments, are fully washable too. They're also slim in construction, and reduce the need for thick socks, so help to eliminate pressure points and the restriction of blood flow.

KEIS insoles may also be used in conjunction with the other products in the KEIS range, using the Three Way Connector Lead. This allows up to three accessories to be connected to one power supply or controller.

A large range of connectors, temperature controllers and battery packs is available from KEIS, so riders can choose the perfect winter warming combination.

KEIS Heated Insoles are priced £39.99 while the Three Way Connector Lead retails at £5.98.

Both are inclusive of VAT at 15%.

For further info and details on the full range of KEIS accessories, call **01256 704909** or visit
