Shiny Happy People with SDOC100 polish

S Doc100 Paint and Plastic Polish

Sdoc100 Power Gel has built a reputation as one of the best bike cleaning products available – it's Germany's No.1 – and their new Paint and Plastic Polish follows the successful formula for creating a product that is perfect for the specific requirements of motorcyclists.

Specially formulated for motorcycle bodywork, the solvent-free polish will not attack decals but produces a deep gloss finish on all smooth surfaces, such as painted metal parts (including multicolour and metallic paints). Sdoc Paint and Plastic Polish will also revitalise weathered paintwork, plastics, acrylic screens and can even be used on visors (although not mirrored ones).

Easy to apply, Sdoc Polish seals polished surfaces with integrated wax components, removing fine scratches, such as those caused by knees rubbing on fuel tanks, creating a water-repellent coat, which in turn helps the bike to stay cleaner for longer.

Sdoc polish is also economical – simply apply the cream sparingly with a soft cloth, leave for a few moments to dry and buff off with a clean cloth for the ultimate finish.

Priced at **£9.99** Including VAT at 15%. If it doesn't say Sdoc100 it isn't from Germany's No1...
