

Press release April 10

Ventura Fits Right on new VFR

With performance, handling and comfort, the new VFR1200 can eat up the miles quickly and easily. Combining the best features of soft and hard luggage, Ventura's Bike Pack system is perfectly suited to the VFR; offering serious carrying capacity, in a stable and secure package, which won't affect performance, handling or styling.

Unlike any other soft luggage available, the Ventura Bike Pack system uses a tailor made mounting rack, which is discrete, lightweight and doesn't add width to the machine like hard luggage pannier-mounting systems. It's quick and easy to fit to the VFR, using only the existing grab rail mounts, and requires no drilling or cutting, or the addition of any extra brackets.

The unique rack mounting system keeps the load stable and secure, and ensures it doesn't shift, even during hard riding. It also eliminates the need for unreliable and potentially damaging straps/bungee chords, and doesn't use a fiddly lock and key system; simply slide on and ride off...

When the destination is reached, both Pack and Rack can be removed in seconds, leaving only the discrete L-Brackets behind. The rider then has the option of fitting a pillion Grab Handle or a Sport Rack, designed especially for transporting small loads. A huge range of packs is available – from a 35-litre weekend bag, to a massive 102-litre touring combination – and can be zipped together to offer multiple solutions for commuting, solo weekends away or two-up touring; a complete system such as the one pictured (brackets, rack and 51-litre Spada Pack) retails for £259.96.

For further details and a full list of fitments and pack options, call Ventura on **01256 704909** or visit www.ventura-bike.co.uk
