## Gold disc from XENA

### *Xena X2 Disc Lock is SoldSecure Gold approved*

Motorcycle and scooter riders can now benefit from SoldSecure Gold standard theft protection whenever they ride, thanks to XENA's new compact X2 V-Lock. Measuring only 85x56x65mm, and weighing just 679g, the X2 is compact and light enough to be stashed in bike-mounted luggage, a backpack, or under the seat, so it can be on-hand whenever and wherever the machine is parked.

Despite the compact size and low weight, the X2 is exceptionally tough. Constructed from high-grade stainless steel, it repels drill and hammer attacks, and is also 100% corrosion resistant. Its unique V shape provides a high strength-to-weight ratio, and effectively doubles the work for any potential thief because both sides must be overcome to open it. Both the body and lock barrel of the X2 are ice-spray proof too.

The 14mm double-locking, hardened-steel locking pin is secured with XENA's maximum security key and barrel (which has 250,000 possible key combinations and is pick proof), placing the XENA X2 V-Lock firmly in the SoldSecure Gold category.

SoldSecure is an independent body funded by UK insurers, and administered by the Master Locksmiths Association. Gold is their highest standard and security devices must withstand picking, drilling, slide hammering, sawing, a 'wedging test' and a torque test to qualify.

The X2 V-Lock is available in yellow or stainless steel finishes priced at £21.00 and £24.01 respectively. For further details call Motohaus Powersports Ltd. on **01256 704909** or visit [www.motohaus.com](http://www.motohaus.com)
