**HEAVY DUTY
TEMPERATURE
CONTROLLER**

OPERATING INSTRUCTIONS

SAFETY & ENVIRONMENT FIRST

-  Do not dispose of electrical equipment with standard domestic waste. Contact your local authority for information specific to your area.
- Only operate on 12V systems. The unit will be irreparably damaged if operated at other voltages
- Do not adjust the controller while operating a motorcycle or other machinery
- Do not allow the unit to become wet
- Do not modify or disassemble any part of the system in any way
- Do not use if the product is visibly damaged

The Keis Heavy Duty Controller is suitable for all Keis garments and accessories (not heated grips) either operated separately or together. e.g. Jacket, gloves and insoles.

USING THE CONTROLLER

Locate the Controller Input and connect to the Fused Supply Lead from the vehicle. Connect your Keis garment to the Controller Output taking care that no wires obstruct the normal operation of the vehicle.

To operate press and hold the Power Button for one second. The Controller will initialise on Maximum power (100%). Briefly pressing the Power Button will cycle the temperature through 'High' (75%), 'Medium' (50%), 'Low' (25%) and back to Maximum. To switch off press and hold the Power Button for one second. Place the Controller in a waterproof pocket when not being operated.

DO NOT OPERATE THE CONTROLLER WHILE DRIVING!

TECHNICAL DATA

Voltage: 12V Only.
Power Capacity: 150W Maximum.
